NATURAL CHOICE TO BEST YOU

荟萃优质源于天然

EUPHROS Concentrated natural omega-3s odorless fish oil
有科学根据证明EUPHROS纯天然高密度无味OMEGA-3鱼油
对心脏，大脑，眼睛和关节健康有极大益处。
它可以帮助舒缓神经系统和平衡精神紧张。

FREQUENTLY ASKED QUESTIONS

常见问答

Q

EUPHROS Concentrated natural omega-3s odorless fish oil manufactory?

EUPHROS 鱼油生产工厂介绍

A

It is a TGA (Therapeutic Goods Administration) licensed Contract Manufacturing facility, specializing in complementary medicines and health food products, all manufactured under strict GMP (Good Manufacturing Practice) guidelines. It is offering: A 100% "Stability Testing Solution" for all your formulation needs

我们的生产工厂是一家专业持有TGA牌照的生厂家，专注药物，保健品和健康食品的生产。所生产的产品是具有GMP制造标准。它对所有产品都会提供100%稳定测试结果报告。

Q

EUPHROS Concentrated natural omega-3s odorless fish oil from and function?

EUPHROS 鱼油来源于哪里功效是什么？

A

EUPHROS regularly test their fish oil mercury.

Fish oil is extracted from cold water fish and is a natural source of marine omega-3 fatty acids. Fish oil contains the omega-3 fatty acids EPA and DHA, and can be taken as a dietary supplement. Fish oil provided an anti-inflammatory action within the body which may reduce inflammation and joint swelling associated with arthritis. Omega-3 fatty acids are also important for cardiovascular health.

In addition to their benefits, EUPHROS fish oil 2000 is a great alternative to take if you can't manage the recommended 2-3 serves of a week. It is also high in DHA which is necessary for the normal function of the eye, brain and nervous system.

EUPHROS鱼油是从日本冷水鱼中提取的，定期测试他们的鱼油汞。并且是海洋欧米茄-3脂肪酸的天然来源。鱼油含有欧米茄-3脂肪酸EPA和DHA，可作为膳食补充剂。鱼油在体内提供抗炎作用，可减少与关节炎有关的炎症和关节肿胀。欧米茄-3脂肪酸对心血管健康也很重要。除了它们的好处之外，EUPHROS鱼油2000是一个很好的选择，如果你无法管理一周推荐的2-3份服务。它对于眼睛，大脑和神经系统的正常功能所必需的DHA也很高。

Q

EUPHROS Concentrated natural omega-3s odorless fish oil ingredients?

EUPHROS 鱼油配料是什么？

A

Fish oil (Natural) 2g (2000mg) Containing omega-3 marine Triglycerides 300mg as

Eicosapentaenoic Acid (EPA) 360mg

Docosahexaenoic Acid (DHA) 240mg

No added sugar, yeast, gluten, starch, heat, corn, milk, derivatives, preservatives, artificial colors, flavors and sweeteners.

鱼油（天然）1克（2000毫克）含有omega-3海洋

甘油三酯300mg

二十碳五烯酸（EPA）360mg

二十二碳六烯酸（DHA）240mg

不添加糖，酵母，麸质，淀粉，热量，玉米，牛奶，衍生物，防腐剂，人造色素，香料和甜味剂。如果症状持续，请咨询医生或医疗保健专业人员。

CLINICALLY PROVEN- HEALTHING MIRACLE

临床实验的证实，维持健康的奇迹

EPA (二十碳五烯酸) 俗称血管清道夫

- 是制造前列腺的主要成分, 能够调节血脂, 降低血液粘稠度
- 预防血栓和硬塞形成, 改善供血不足, 头晕头痛等症状, 增强胃功能, 保护心血管系统的健康

DHA (二十碳六烯酸) 俗称脑黄金

- 能活化脑细胞, 预防健忘症, 预防老年痴呆
- 强化免疫系统
- 有利于眼部健康, 延缓视力衰退, 调节血脂, 降低胆固醇含量

Fish oil, English name is Fats and Glyceridic oils, is a general term for all oils in fish. Its main ingredients are Omega-3 fatty acids (including DHA and EPA), a polyunsaturated fatty acid that reduces inflammation, lowers blood fat, and prevents cardiovascular disease. It is one of the most popular and widely used dietary supplements. Fish oil was first extracted from deep-sea fish. Deep-sea fish, like salmon, do contain a wealth of Omega-3 unsaturated fatty acids that are beneficial to brain development and cardiovascular. Therefore, dietitians will advise consumers to eat more deep-sea fish before, there is no problem. But now the environment has changed and our intake has changed. Marine pollution makes it difficult for us to eat safe, clean wild deep-sea fish.

As a dietary supplement, fish oil can meet the needs of more people, and in the extraction process, it can effectively remove the pollutants originally present in the raw materials. Since the discovery of Omega-3 in fish oil by Danish scientists in 1971, the number of research articles on fish oil has been about 20,000 since the beginning of 2015. Not only does it fully study the various health benefits of fish oil, but also clarifies the mechanism of action of fish oil and its role in the prevention and intervention of various diseases. According to statistics, the daily intake of omega-3 by Chinese people is 49 mg, while the Chinese Nutrition Society recommends 250-2000 mg per day.

Clinical trials have shown that fish oil is good for cardiovascular and cerebrovascular health, helps maintain normal blood circulation, improves high triglycerides, improves high blood pressure, and prevents diseases such as myocardial infarction, stroke and arteriosclerosis. So if you want to prevent three highs, or have three high people, you can take fish oil for health care and management.

鱼油, 英文名称为 Fats and Glyceridic oils, 是鱼体内的全部油类物质的总称。其主要成分为 Omega-3 脂肪酸(包括 DHA 和 EPA), 是一种多元不饱和脂肪酸, 可降低发炎反应, 降低血脂、预防心脏血管疾病。是目前最受欢迎、应用面最广的膳食补充剂中的一种。鱼油最早是从深海鱼中提取的。深海鱼, 像三文鱼中, 确实含有比较丰富的对大脑发育、心血管有益的 Omega-3 不饱和脂肪酸。因此之前营养师们会建议消费者多吃深海鱼, 是没有问题的。可现在环境变了, 我们的摄入方式也要改变了。海洋污染让我们难以吃到安全的、干净的野生深海鱼了。

而作为膳食补充剂的鱼油可以满足更多人的需求, 而且在提取工艺上, 可以有有效的去除本来存在于原料中的污染物。自 1971 年丹麦科学家发现鱼油中 Omega-3 之后, 截至 2015 年初的统计, 有关鱼油的研究 章已有大约 20000 篇。不仅充分研究鱼油对健康的种种益处, 也深入的阐明了鱼油的作用机制, 以及在多种疾病的预防与干预中的作用。据统计, 中国人目前每天欧米伽-3 的摄入量为 49 毫克, 而中国营养学会推荐的是每天摄入 250-2000 毫克。

临床实验证明鱼油有益于心脑血管健康, 有助于维持正常的血液流通, 能改善高甘油三酯症, 改善高血压, 预防心肌梗塞, 脑中风及动脉硬化等疾病。所以如果想要预防三高, 或者已经有三高的人, 可以服用鱼油来进行保健和管理。
